## TECHNICAL SKILLS

---

Languages & Databases	JavaScript, PHP, Python, Java, Swift, MySQL, MongoDB, Node.js, WordPress
Frameworks	Vue.js, React, Laravel, Expo
Web Development	HTML, CSS, Bootstrap, JSON, API Development
Tools	Git, Jenkins, Docker, Jira, Firebase, Salesforce, Postman, New Relic, Proxyman

## EXPERIENCE

---

### Partner Integration Engineer (Promoted):

MyBambu - In Person

April 2025 - Present  
West Palm Beach, Florida

- Lead partner integrations across payments (TaboPay, Astra, Galileo, Trice), data connectivity (Plaid), and IDV providers (Veriff), defining architecture and guiding engineering teams through implementation
- Drive development of proof-of-concept applications to validate partner APIs/SDKs and present integration options to product and compliance teams
- Author technical design documentation and establish product flows that align with both regulatory expectations and business requirements
- Provide technical direction and mentorship to developers on integration points, ensuring scalable, compliant, and reliable solutions
- Spearheaded resolution of a critical address validation issue in middleware, reducing manual reviews and improving customer enrollment rates
- Lead vendor evaluations by coordinating technical reviews, negotiating pricing, and influencing contract decisions to align with company strategy

### QA Engineer:

MyBambu - In Person

December 2024 - Present  
West Palm Beach, Florida

- Build and maintain a Swift-based internal test environment app with integrated logging, unit tests, and UI tests
- Maintain an internal documentation site to support QA and developer onboarding and collaboration
- Use Firebase and Remote Config to test features and behavior under various runtime configurations
- Validate partner integrations and webhook responses using Postman
- Track test cases, bugs, and sprint work using Jira
- Assisted with iOS production releases by running Fastlane builds during a transition period

### Software Engineer Internship:

Seacoast Bank - hybrid

June 2023 - August 2024  
Stuart, Florida

- Developed a *Vue.js* dashboard and front-end application to display real-time API statuses and detailed metrics such as current status, average recovery time, last recovery timestamp, and cumulative downtime over 30 days.
- Built a back-end API using *Laravel* to connect to a Docker-implemented database to log downtime statistics and manage API performance data.
- Isolated different web applications into dedicated *Docker* containers, enabling deployment and version tracking while logging changes for monitoring purposes.
- Upgraded old PHP forms to use *Bootstrap* and Okta for improved verification and user experience.
- Implemented automated email notifications for developers, triggered by API downtimes or Docker image changes, and added a PDF reporting feature to generate detailed reports on service statistics.

EDUCATION

**Bachelor of Arts in Computer Science**, *Florida Atlantic University*  
GPA: 3.5  
Secondary Certificate: Artificial Intelligence, College of Engineering and Computer Science

Graduated December 2024
