# CHASE MOFFAT

(772)  $486-0910 \diamond Boca Raton, Florida$ 

cmoffat2020@fau.edu \(\phi\) www.linkedin.com/in/chase-moffat \(\phi\) https://github.com/Chasem11

### **EDUCATION**

Bachelor of Arts in Computer Science, Florida Atlantic University

Graduated August 2024

GPA: 3.5

#### TECHNICAL SKILLS

Languages & Databases JavaScript, PHP, Python, Java, Swift, MySQL, MongoDB, Node.js, C#, WordPress

Frameworks Vue.js, React, Laravel, .NET

Web Development HTML, CSS, Bootstrap, JSON, API Development

Tools Git, GitHub, Jenkins, Docker, MS Office, PowerBI, Windows 10, VS, VS Code, Xcode

#### **EXPERIENCE**

## Country Club Attendant

July 2022 - June 2024

Boca Grove

Boca Raton, Florida

- Oversaw the maintenance of pool and fitness areas ensuring optimal condition
- Guided members on correct workout techniques and postures
- Worked with my team to address member inquiries and resolved any concerns promptly

# Software Engineer Internship:

June 2023 - August 2024

Seacoast Bank - hybrid

Stuart, Florida

- Developed a *Vue.js* dashboard and front-end application to display real-time API statuses and detailed metrics such as current status, average recovery time, last recovery timestamp, and cumulative downtime over 30 days.
- Built a back-end API using *Laravel* to connect with a Docker-implemented database for logging downtime statistics and managing API performance data.
- Isolated different web applications into dedicated *Docker* containers, enabling deployment and version tracking while logging changes for monitoring purposes.
- Upgraded old PHP forms to use *Bootstrap* and Okta for improved verification and user experience.
- Implemented automated email notifications for developers, triggered by API downtimes or Docker image changes, and added a PDF reporting feature for generating detailed reports on service statistics.

# **QA** Engineer:

December 2024 - Present

MyBambu - In Person

West Palm Beach, Florida

- Developed a Swift-based internal test environment app with logging and integrated unit and UI test coverage
- Integrated partner webviews into the testing app to support end-to-end QA scenarios
- Created an internal employee documentation site to assist QA and developers with onboarding and processes
- Utilized Firebase and Remote Config for testing app behavior under dynamic configurations
- Tested partner integrations using Postman and validated webhooks and API responses
- Used tools like New Relic and Salesforce to investigate issues and monitor system performance
- Regularly used Jira for test case management, bug tracking, and sprint planning
- Assisted with iOS production releases by running Fastlane builds during a transition period

#### **PROJECTS**

# Task Manager and API - React.js and Node.js:

- Developed a task management application with *React.js* and a RESTful API using *Node.js/Express* for managing tasks and users, with secure CRUD operations.
- Integrated JWT authentication and a responsive UI using Bootstrap; utilized MongoDB for real-time data storage.

### Media Library API - Laravel:

- Created a web API that enables viewing, renting, and returning of books and movies, plus user account management.
- Integrated a basic chatbot for item inquiries and implemented Swagger documentation for easy API exploration.

# Personal Portfolio - React.js:

- Developed a responsive portfolio website using *React.js* to showcase my projects, skills, and experience.
- Integrated GitHub API to display top projects and used EmailJS for a functional contact form.
